Residential Swimming Pool Liner Information

Your vinyl liner is produced from premium grades of vinyl using advanced manufacturing methods. Like any other product, which is subject to the rigors of various climates and a host of other elements, regular maintenance is required to provide the longest possible service.

Our warranty requires that the liner is installed in accordance with the manufacturer's instruction – this is the responsibility of the installer. It also requires that the pool be properly maintained – this is your responsibility.

If not properly installed and maintained your liner will fail prematurely for non-warranty reasons.

Premature aging of vinyl is most often caused by:

1. Over Stressing – usually an installation problem.
2. Pollutants which wash up on the liner at and above the water level, these in conjunction with the sun will dry the liner out if not cleaned regularly. Suntan lotions, cosmetics, body oils, acid rain and other wind and rain born compounds which are allowed to accumulate during the life of your vinyl liner.
3. Improper pH will either form scale on the liner (High pH), or extract plasticizers from the liner (Low pH), causing surface build up or drying out and wrinkling of the liner. pH imbalance will also affect the life of the printing inks and base material.
4. Use of improper chemicals including the use of cleaners, which are not pH neutral.

DON'T: Lower the water below 2' in the shallow end without the advice of your dealer.

DON'T: Use any chemical products other than those specifically made for pool use.

DON'T: Neglect maintenance (including cleaning and adding proper chemistry)

DON'T: Allow dirt to accumulate (regular brushing of the walls should be part of your maintenance plan)

DON'T: Allow glass or sharp objects near your liner.

DON'T: Allow concentrated chlorine to accumulate in the pool. Care must be taken that concentrated solutions do not leach back to the pool, (from automatic chlorinators or chlorine in the skimmer), when the filtration system is off.

DO: Learn maintenance and chemical procedures.

DO: Maintain proper chlorine and pH levels.

DO: Clean the liner, especially the dirt ring above the water line. Use an approved surface cleaner that is pH neutral.

DO: Make repairs immediately.

DO: Properly winterize and cover pool in the off-season.

DO: Install and maintain all safety material.

With proper maintenance your vinyl liner will give you many years of swimming pleasure.
