## Backwash Instructions

1. Make sure your backwash hose is rolled out (if applicable)
2. Get your proper amount of DE ready by the skimmer, which is 1LB per 10SQFT of filter area. (Eliminate this step if using a sand filter)
3. Turn off your pump
4. Turn your multiport valve to the 'Backwash' option
5. Turn on your pump and let the water flush out of the backwash valve/hose until your water goes from dirty to clear
6. Turn off your pump
7. Turn your multiport valve to the 'Rinse' option
8. Turn on your pump for 10-30 seconds to rinse out any excess debris and ensure a proper filter cleaning
9. Turn off your pump
10. Turn your multiport valve back to the 'filter' option
11. Put your appropriate amount of DE into the skimmer (Eliminate this step if using a sand filter)
